Professional Summary

Experienced systems engineer at Infosys with expertise in MySQL, Postman, and data management. Eager to transition into a skilled MERN Stack developer role.

Education

Year	Degree/Examination	Institute/Board	CGPA/Percentage
2021	Bachelor of Technology	Vardhaman College of Engineer, Shamshabad	9.0/10.0
2016	Intermediate(Class XII)	Narayana Junior College, Narayanaguda	94.4%
2014	Matriculation(Class X)	Brilliant Grammar High School, Pebbair	8.5/10.0

Experience

INFOSYS | SYSTEMS ENGINEER

October 2021 -

Present

- Successfully completed frontend developer training at Infosys in October 2021. Transitioned from Systems Trainee to active project member upon completing training.
- Played a key role in a project focused on sending client-required data. Utilized SQL and Postman APIs proficiently to send essential data, enhancing technical capabilities and problem-solving skills.
- Demonstrated exceptional skills and adaptability as a systems engineer, excelling in both technical and project-related tasks. Received Insta Award for outstanding performance, reflecting dedication and expertise in the project. Earned client recognition for exemplary work, showcasing professionalism and commitment to delivering high-quality results.
- Developed effective communication skills through client interactions, enhancing the overall project experience. Enhanced presentation skills, enabling clear and concise communication of project goals and progress updates. Acquired training skills, demonstrating the ability to share knowledge and expertise with colleagues. Mastered basic joins in SQL, expanding technical knowledge and contributing to the project's success.

Certifications

- Udemy | HTML & CSS Tutorial and Projects Course(Flexbox & Grid)
 - Learned HTML and CSS, especially Flexbox and Grid.
 - Building projects
- Newton School | MERN Stack Developer
 - I have learnt HTML, CSS. I am learning Javascript, ReactJS, MongoDB and NodeJS.
 - Participating in a coding contest.
 - Building projects.

Projects

1. My Portfolio | [Website Link](#) | [Github Link](#)
 - a. This website provides information about my technical skills and projects, showcasing my abilities and expertise.
 - b. Technologies used : HTML CSS Javascript Git Github

- c. HTML enabled me to create my website. I mastered CSS properties like position, top, left, right, bottom, and media queries for responsive design. I also learned for toggling containers based on screen size. Additionally, I acquired skills in setting up a Git repository, connecting local to remote repository, and committing and pushing changes using GitHub.
- 2. Food | [Website Link](#) | [Github Link](#)
 - a. Technologies used : HTML CSS Javascript Git Github
 - b. HTML enabled me to create my website. I mastered CSS properties like box shadow, border radius, opacity and changing style of particular container when hovered. I also learned for hide and show navbar when required. Additionally, I acquired skills in setting up a Git repository, connecting local to remote repository, and committing and pushing changes using GitHub.

Skills

Computer languages: Java, HTML, CSS, Javascript

Software packages: MySQL, VSCode, Github

Additional Courses Taken: Data Structures

Soft Skills: Communication Skills.

Co-Curricular Activities

- Participating in a coding contest.
- Being with nature as a tree plantation.
